***Allowable Subject Matter***

Claims 1-30 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Barnes et al. teaches variable impedance matching circuit.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach the claimed invention including: the control means includes initial control means for evaluating the initial load value information stored in the storage section upon starting control of the matching circuit, and if there is initial load value information for providing impedance matching, for controlling the matching circuit so as to have a load value corresponding to this initial load value information; and if there is no initial load value information for providing the impedance matching, matched load value deriving means for deriving matched load value information which is information on the load value for providing the impedance matching, using said initial load value information stored in the storage section, and controlling the matching circuit so as to have a load value corresponding to the derived matched load value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
